

Hexaware Technologies - Generative AI Developer

Position

Generative AI Developer

Department

AI Center of Excellence (AI CoE)

Experience

0-5 Years

Role Summary

Build enterprise-grade Generative AI solutions using LLMs, RAG systems, AI agents, and modern AI engineering practices.

Key Responsibilities

Develop GenAI applications, build RAG pipelines, create AI agents, integrate enterprise data sources, optimize models, and collaborate with business stakeholders.

Required Skills

Python, Machine Learning, LLMs, Prompt Engineering, LangChain, LangGraph, FastAPI, Vector Databases, SQL, Git.

Preferred Skills

Knowledge Graphs, LLMOps, Docker, Kubernetes, AWS/Azure/GCP, MLOps, Hugging Face.

Education

Bachelor's or Master's degree in Computer Science, AI, Data Science, or related field.

Career Path

GenAI Developer → Senior GenAI Engineer → Lead AI Engineer → Principal AI Architect.
